## Purpose

This Policy is Aker Floating Production's statement of its intentions and principles in relation to the fulfilment of requirements and expectations of environmental issues. It is an integral part of the strategic considerations within Aker Floating Production.

It provides the foundation for all personnel working within AFP Group for establishing strategies and goals and taking actions to achieve the goals and fulfil the policy.

## Scope

This Policy is valid for all of the AFP Group of companies, consisting of Aker Floating Production ASA, Aker Contracting FP ASA and AFP Operations AS.

## Policy Statement

AFP Group recognises that we have a responsibility for the environment by being in compliance with legal and regulatory requirements and further to conduct our operations in a manner that is environmentally responsible.

Our Environmental Policy and program shall identify the criteria and focus for preventing, reducing or mitigating emissions.

We are committed to:

- Operate according to the ISO 14001 standard, class, flag, industry and any international or local regulatory requirements
- Comply in accordance with requirements set by contracts
- Minimise waste by evaluating our operations to ensure that they are as efficient as possible
- Monitor and minimise emissions to air and sea
- Keep usage of chemicals in our operations as low as reasonable practicable
- Actively promote recycling of waste both internally and amongst our suppliers
- Design products and services to have no undue environmental impact, to be safe and efficient in consuming energy and natural resources
- Conduct our operations through efficient use of materials and energy, minimizing waste and damage to the environment

We achieve this by:

- Establishing environmental KPIs and targets and monitoring these on a regular basis
- Periodically reviewing this environmental policy
- Providing training, information and procedures for the prevention of pollution to air and sea

Our KPIs and targets shall capture the environmental objectives and be an integral part of the company's monitoring system. Environmental achievement shall be evaluated and reported on a yearly basis.
